Profile

Junior Software Engineer specialized in **Full-Stack development (React, Node.js)**. Strong experience building web applications and designing **REST and GraphQL APIs**. Comfortable working across the entire stack, from database design to responsive UI. Currently seeking my first full-time position to further grow my technical skills and contribute to real-world projects.

Professional experience

Full Stack Developer (Pre-Hiring Internship), Tython

- Developed and maintained full-stack web applications using **React, Node.js**, and **TypeScript**, ensuring scalable and clean architecture.
- Working with **APIs, databases, Git/GitLab** in an Agile environment.
- Designing and integrating reusable components and widgets.
- Collaborating with the development team to build and improve application features.

08/2026 – Present
Casablanca, Morocco

Full Stack Developer Intern (PFE), OCP

- Developed a full-stack stock management application for chemical products using **React, Express.js, GraphQL, PostgreSQL**, and **TypeScript**.
- Implemented inventory tracking, product management, authentication, and role-based access control with a responsive user interface.
- Integrated an **LSTM** model to predict future stock demand from historical inventory data.

03/2025 – 09/2025
Casablanca, Morocco

Full Stack Developer Intern (PFA), Sonasid

- Developed a full-stack Supplier Invoice Management System using **React, Spring Boot, PostgreSQL**, and **REST APIs**.
- Implemented invoice submission, validation, approval workflows, status tracking, and role-based access control.
- Built interactive dashboards for invoice status, payment tracking and approval workflows.

07/2024 – 09/2024
EL Jadida, Morocco

Education

Engineering degree in Computer Science, field MIAGE, Ecole marocaine des sciences de l'ingénieur (EMSI)

2020 – 2025
Casablanca, Morocco

Baccalauréat in Physical Sciences

2018 – 2018
EL Jadida, Morocco

Technical skills

Languages

Java, JavaScript, TypeScript, Python, SQL

Back-End

Node.js, Express.js, Spring Boot

Front-End

React(Hooks, Redux Toolkit, React Testing Library), Tailwind, Bootstrap

Database

MongoDB, MySQL, PostgreSQL

Tools

Git, Github, Postman, Apollo, VsCode

Methods

Agile/Scrum, Test-driven development (TDD), UML, Merise, MVC

API

REST, GraphQL (Apollo)

Projects

Medical Appointment Platform

- Built a full-stack clinic management system with **JWT authentication**, **role-based** access control, and a business rule preventing double-confirmed appointments within a 30-minute window.
- Designed a **normalized** PostgreSQL schema with UUID primary keys, cascade foreign keys, and composite indexes, managed schema evolution through **Sequelize migrations** and a **seed** script.
- Developed a REST API with **Zod input validation** and structured error handling
- Built a React + TypeScript SPA with 5 pages: Login, Dashboard (live stats), Patients (search + pagination), Patient details, and Appointments (filters + inline status updates).

Stack: React.js, Node.js, Express.js, PostgreSQL, Sequelize, TypeScript, JWT, Zod

CI/CD Pipeline for a Containerized Web App

- Designed a **GitHub Actions** workflow that runs linting and automated tests on every push and pull request, blocking merges on failure.
- Built a multi-stage **Dockerfile** to produce small, production-ready images, and orchestrated services with **Docker Compose**.
- Automated build and push of versioned Docker images to **Docker Hub / GitHub Container Registry** on each release.

Stack: Node.js, React, Docker, Docker Compose, GitHub Actions
